Dear Prescribers,

As the pandemic continues, we are committed to doing all that we can to support our prescribers and patients, to keep our staff safe, and to help to reduce the number of people exposed to the virus. Together, we are facing a truly unprecedented situation.

With so much strain on the healthcare systems right now, and the uncertainty of how care will be delivered in months to come, you can continue to prescribe the eNeura SAVI and sTMS mini with confidence. **Our remote operations are in place. We have no service interruptions and your patients are receiving prompt, individualized care by our nurses. We are connected like never before!**

During this time of limited contact, many clinicians are prescribing eNeura SAVI via telemedicine services or phone consultations. The device is shipped directly to the patient's home so there is no need for a trip to the pharmacy.

Thank you for the patient care you are providing during this challenging time. May you and yours remain safe and healthy. We will miss seeing you at the AHS and look forward to seeing you at the clinical meetings this fall!

Best regards,

Your eNeura Team

eNeura SAVI™ Fills the Gap. The only FDA approved Migraine Treatment for both Acute and Preventive Use for Patients 12 years old and above. Effective but without the side effects of medications. Integrated compliance and efficacy reporting.
